Docket No.: 21399-US-PA

AMENDMENTS

To the specification:

Please amended paragraph [0022] (beginning from page 4, line 21) as follows:

[0022] The optical active component (20) has first multiple terminals (21) corresponding to the first metal pads (13) on the substrate (11), a source array (22) corresponding to the lens array (12) and multiple alignment keys (23) corresponding to the alignment keys (17) on the substrate (11). Optical axes of the source array (22) and lens array (12) are parallel. The source array (22) is composed of multiple lasers or light detectors.

Please amended paragraph [0024] (beginning from page 5, line 7) as follows:

[0024] The circuit board (40) has multiple third terminals (41) corresponding to the third metal pads (15) on the substrate (11). The circuit board (40) controls the driver IC [(20)]30 because the third metal pads (16) are connected to the second metal pads (14).
